

Door Contact DC-29

An essential anti-intrusion solution for your home

DC-29 is a door contact designed to monitor any irregular opening/closing of doors and windows and alert your Home Security System to such potential dangers. A crucial component of the home security network, DC-29 effectively prevents burglary and damage to personal property.

Equipped with battery life of more than three years, DC-29 sends tamper, supervisory and low battery signals to your Home Security System to ensure your house is under uninterrupted protection. This economic and efficient model includes a powerful magnet that creates a 20mm space between DC-29 and the magnet to make installation easier and more flexible.

The compact and slim design of DC-29 suits any residential settings. Wireless and hardly perceptible, DC-29 is a must-have anti-intrusion solution for the security of your home.

Features:

- Easily mounted on door or window frames
- Compact and slim design
- Compatible with any home décor and hardly noticeable
- Tamper protection to prevent unauthorized removal, sabotage or unsteady installation
- Randomized supervision signals for system integrity checks and troubleshooting
- Low battery detection
- Powerful magnet included to create a 20mm space between Door Contact and the magnet
- LED serving as a fault and test mode indicator
- Compliant with CE requirements

Specifications:

- Power: 1.5V AAA Alkaline X 2
- Battery life: 3.9 years* (433MHz)/ 3.5 years* (868.35MHz FM)/ 3.1 years* (868.6375MHz Narrow FM)
- Available radio frequencies: 433MHz/868.6375MHz Narrow FM/868.35MHz
- Radio frequency ranges: 433MHz: Over 200 meters in open space
868.35MHz/868.6375MHz: Over 300 meters in open space
- Operating temperature: -10°C to 50°C
- Operating humidity: Up to 95% non-condensing
- Dimensions: 104.75mm X 28.5mm X 19.5mm

* Note: Battery life is calculated at an average of 20 activations per day.
