

## PSS-29 Power Switch

## Small Switch, Big Difference An Easy Way to Save More

- Remotely Turn On/Off Home Appliances
- Slimmer Design for Better Aesthetics
- Simple Plug and Play Installation

The PSS-29 power switch is an ingenious product designed to make home automation easier. Depending on the control panel it is paired with, you can turn on/off the attached electronic appliances anywhere, anytime via phone calls, SMS commands or Smartphone Apps.

Installation of PSS-29 takes only a few seconds. Simply plug the power switch into the power outlet and then plug the appliance into the front socket. Besides easy installation, the compact design of PSS-29 offers a polished and modern look that blends naturally with your home décor.

By allowing you to remotely turn off appliances not in use, PSS-29 helps you reduce household energy consumption and save money. Integrating this device into your home automation system is a smart way to combat soaring energy costs. Try the PSS-29 power switch today to see the difference it can make!
