

## IR-16ZBS Passive Infrared Motion Sensor

- Detects and reports suspicious movements
- Detection range: 12 meters over a 110° angle
- Option of high-power and low-power models
- Long battery life
- Compatible with other manufacturers' ZigBee devices

### **IR-16ZBS Passive Infrared Motion Sensor**

## Specifications

#### IR-16ZBS

| Battery type            | CR123A 3V lithium battery x 1                    |
|-------------------------|--|
| Battery life            | Low-power model: 4.8 years*                      |
|                         | High-power model: TBD                            |
| Communications protocol | ZigBee Pro HA 1.2                                |
| Transmit power          | Low-power model: +4 dBm                          |
|                         | High-power model: +19 dBm                        |
| Frequency               | 2.4GHz band                                      |
