

BX-15ZBS Outdoor Bell Box

Delivering High-Powered Sirens and Strobes to Protect Your Premises

- Long battery life
- Unique alarm sounds for fire and burglary
- Squawk notifications of arming and disarming

The BX-15ZBS is a battery-operated outdoor bell box that deters potential intruders and alerts you to emergencies with loud 104dB siren sound and high-powered strobe light. Featuring long battery life of more than 2.5 years, the BX-15ZBS is an essential component of an effective early warning system.

This ZigBee bell box generates unique alarm sounds for fire and burglary to inform users of the type of danger at hand. It provides programmable siren duration of 3, 5 and 10 minutes. In addition to producing audible and visible warnings in the case of emergency, the BX-15ZBS emits squawk notifications of its low battery status and of the arming and disarming of a security system. This bell box also transmits supervisory and low battery signals to the control panel to ensure its faultless operation.

Enclosed in its waterproof and UV resistant housing with an IP45 rating, this wireless, easy-to-install outdoor siren is a premium choice to protect residential and commercial premises. Its anti-tamper design prevents unauthorized removal and vandalism. The BX-15ZBS is compatible with other manufacturers' ZigBee systems and devices.

Features

- Battery life of more than 2.5 years
- Siren output level is 104dB at 1 meter
- Attractive design and high-powered strobe light (choice of red or blue lens)
- IP45 waterproof and UV resistant housing
- Unique alarm sounds for fire and burglary
- Squawk notifications of arming, disarming, and low battery status
- Programmable siren duration of 3/5/10 minutes
- Dip switch allows manual control of strobe light and alarm duration
- Transmits low battery and supervisory signals
- Antenna design for optimal wireless performance
- Cover tamper protection prevents unauthorized removal and vandalism
- Compatible with other manufacturers' ZigBee systems and devices
- Compliant with CE requirements
- ZigBee Certified product

Specifications

Power supply	4 alkaline D batteries
Battery life	More than 2.5 years
Siren output	104dB at 1 meter
Communications protocol	ZigBee Pro HA 1.2
Frequency	2.4 GHz ISM band
Operating temperature	-10°C to +45°C
Operating humidity	Up to 95% non-condensing
Dimensions	287 mm x 202 mm x 67 mm

*Battery life varies by use and configuration.
